Explore our connection to life on Earth

Discover how you are connected to all life with which we share our planet, and be inspired by ways you can help protect life on Earth. The project celebrates Earth's rich diversity of animals, plants and other organisms represented by the Tree of Life, whose branches connect all living things.

- An installation by Naziha Mestaoui, environmental artist and architect.
- Lecture by Prof Pamela S. Soltis and Prof Douglas Soltis, University of Florida Laboratory of Molecular Systematics and Evolutionary Genetics

Public Event

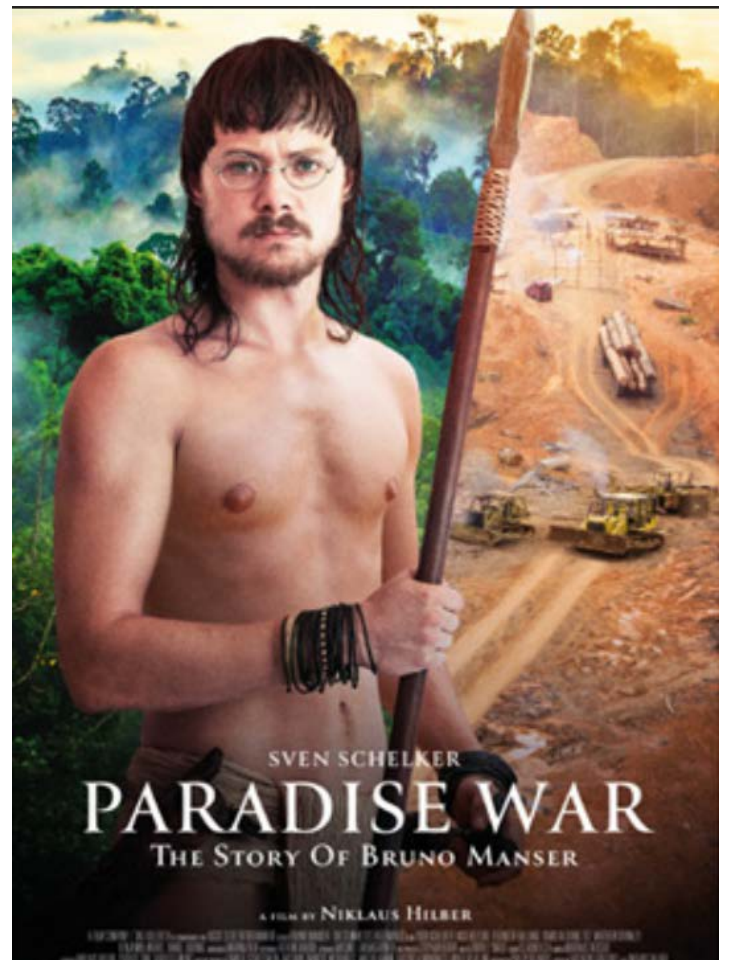

Paradise War – the Story of Bruno Manser

Tuesday, 25 February 2020, 19:00 – 22:00
Davos Congress, Plenary Hall (entrance Talstrasse)
Entry free of charge
Language: English
<https://brunomanser-film.ch>

A film by Niklaus Hilber (141 minutes)

1984: Searching for an experience beyond modern civilisation, Bruno Manser travels into the jungles of Borneo and finds the nomadic Penan tribe. When the existence of the Penan is threatened by relentless deforestation, Manser takes up the fight against logging with a courage and determination that makes him one of the most renowned and credible environmentalists of his time. Based on a true story.

Q&A session, hosted by Dr. Samer Angelone, with the producer, Valentin Greutert, after the film.
